

Quick user guide Coollogger Red 2017

Turn on

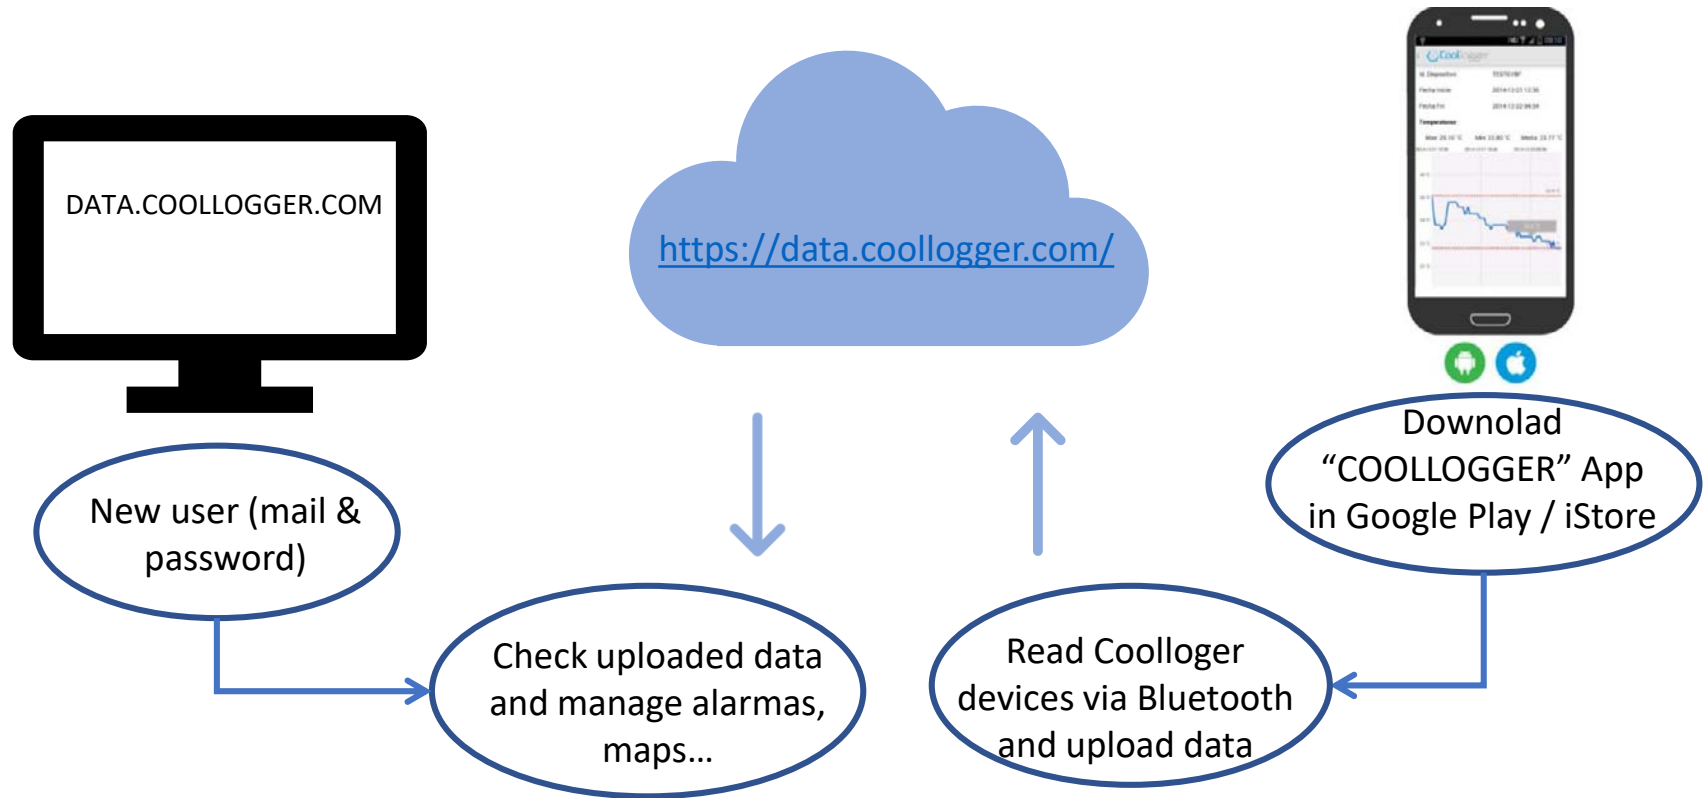

- Press ON button for 7 seconds. Green light will appear
- After this first time, Coollogger can be turn off and on with the phone, with Coollogger Apps via Bluetooth®
- Once the green light appear, Coollogger will begin recording until it is stopped. A period with out recording can also be selected in the Androis/iOS apps

Turn off

- Coollogger Red can be stopped with the Android/iOS Apps and also manually (press the start button for 10 seconds or until red light appears)
- As a safety measure, Coollogger cannot be stopped during the first 60 minutes since it has been started.
- Once stopped, data must be uploaded to the cloud before re-starting.
- A new record will be created once the device is re-started

Cloud Platform and Apps

Light code

 <p>Press start button: Green light = Coollogger is recording</p>	 <p>Sparkling green light: non-recording initial period (if selected in app)</p>	 <p>Press start button: Red light = Coollogger is stopped</p>
 <p>Press start button: Green and red light during 2'' = Coollogger is stopped or memory is full</p>	 <p>Press start button: no light = Coollogger has no battery</p>	 <p>Green and red light, without pressing start button: Bluetooth[®] connection established</p>

The screenshot shows the Coollogger web application interface. The top navigation bar includes the Coollogger logo, a 'SEARCH BY ID' button, a 'MY DATA' button (circled in green), a 'DEVICE MANAGEMENT' button, and a 'CLOSE SESSION' button. Below the navigation bar, the breadcrumb 'Home / My data' is visible. The main content area is titled 'My data' and contains three panels: 'My account settings', 'Settings', and 'Data customize'. A green circle highlights the 'MY DATA' button in the top bar, with three green arrows pointing from it to the 'My account settings', 'Settings', and 'Data customize' panels. Another green circle highlights an 'UPDATE' button in the top right corner of the 'Data customize' panel.
